WORK EXPERIENCE

Web Development Intern

Amzsoft Innovexa - Lucknow (on-site) | Jul 2024-Dec 2024

- Successfully completed 6-month intensive web development internship focused on the **Frontend**.
- Gained hands-on experience building **web applications**, applying modern web development best practices.
- Developed a scalable Learning Management System (**LMS**) using React.js with secure authentication
- Collaborated in an Agile team to implement responsive UIs and Git-based version control.

Web Development Intern

LzyCrazy pvt. Ltd. - Bangalore (remote) | Dec 2025-Present

- Currently pursuing a Frontend Web Development internship at LzyCrazy pvt Ltd, working on real-world production projects.
- Contributed to building **SkillUp (Learning Management System-LMS)** and a **dating Web Application** With 100% responsive UI from scratch.
- Implemented secure authentication, role-based access control (RBAC), and dynamic dashboards to enhance user experience
- Enhanced state management in React apps using **Context API** improving component performance by **20%**.

PROJECTS

RudraStyles - E-commerce Clothing Brand Link	Feb 2025- Feb 2025
◦ Built a modern e-commerce frontend with responsive, mobile-first UI using React and Tailwind CSS ◦ Developed product listing pages with search, filtering, and sorting functionality, improving product discovery and user engagement by 45% ◦ Designed reusable UI components for product cards, categories, and navigation to ensure consistency and scalability ◦ Focused on brand-centric and smooth user experience tailored for an online fashion store ◦ Deployed the application on Vercel, ensuring 99.9% uptime and seamless global access.	
Qalb-Live Real-Time Dating Web Application Link	Jan 2026 - Jan 2026
◦ Engineered 100% of the frontend from scratch using React.js, TypeScript, and Tailwind CSS following a scalable, component-based architecture. ◦ Implemented Firebase Authentication supporting email/password and mobile OTP login, securing user onboarding and managing 100% authenticated sessions. ◦ Developed real-time chat and meeting features using Socket.io, enabling instant message delivery and live user interactions. ◦ Integrated 25+ REST API endpoints for profiles, matches, chats, meetings, and user actions, managing global state via Context API to reduce unnecessary re-renders. ◦ Designed a 100% mobile-first, fully responsive UI, delivering production-ready Frontend code for a live project.	

Achievements: Web Development Certificate (GeeksforGeeks, 2024) | Solved 180+ problems on LeetCode
